The 17th edition of the International Conference on Cognition and Exploratory Learning in Digital Age (CELDA 2020) was held virtually due to the COVID-19 pandemic, from 18 to 20 November 2020.

This conference was organized by the International Association for Development of the Information Society.

The CELDA conference tries to address the foremost issues of concern within the evolving learning processes and supporting pedagogies and applications in the digital age. There had been advances in both cognitive psychology and computing that have affected the educational arena. The convergence of these two disciplines is increasing at a fast pace and affecting academia and professional practice in many ways. Paradigms such as just-in-time learning, constructivism, student-centered learning and collaborative approaches have emerged and are being supported by technological advancements such as simulations, virtual reality and multi-agents systems. These developments have created both opportunities and areas of serious concerns. This event covered both technological as well as pedagogical issues related to these developments. Main topics have been identified. However innovative contributions that do not easily fit into these areas were also considered as long as they were directly related to the overall theme of the conference – cognition and exploratory learning in the digital age.

The CELDA 2020 Conference received 76 submissions from more than 24 countries. Each submission was reviewed in a double-blind review process by at least two independent reviewers to ensure quality and maintain high standards. Out of the papers submitted, 40 were accepted as full papers for an acceptance rate of 53%; 16 were accepted as short papers and 2 were accepted as reflection papers.

Authors of the best published papers in the proceedings of CELDA 2020 were invited to publish extended versions of their papers in:

- A book from Springer

In addition to the presentation of full, short and reflection papers, the conference also included one keynote presentation by Professor Bart Rienties, Head of Academic Professional Development, Institute of Educational Technology, The Open University, UK.

Keynote Presentation:

“WHAT HAVE WE LEARNED FROM 6 YEARS OF IMPLEMENTING LEARNING ANALYTICS AMONGST 100,000+ STUDENTS?”

by Professor Bart Rienties, Head of Academic Professional Development, Institute of Educational Technology, The Open University, UK

Editors: Demetrios G. Sampson, Dirk Ifenthaler and Pedro Isaías
Program Committee Members:

Ah-Choo Koo, Multimedia University, Malaysia
Alke Martens, University of Rostock, Germany
Anthony Y. H. Liao, Asia University, Taiwan
Aparna Lalingkar, International Institute of Information Technology, India
Baltasar Fernandez-Manjon, Universidad Complutense de Madrid, Spain
ChanMin Kim, Penn State University, USA
Charalambos Karagiannidis, University of Thessaly, Greece
Chien Sing Lee, Sunway University, Malaysia
Chih-Hung Lai, National Dong Hwa University, Taiwan
Chun-Wang Wei, Kaohsiung Medical University, Taiwan
Daniel Otto, University of Duisburg-Essen, Germany
David Guralnick, Kaleidoscope Learning, USA
Farshad Badie, Aalborg University, Denmark
Flavio Manganello, National Research Council, Italy
Georgios Zacharis, The University of Ioannina, Greece
Giuliana Guazzaroni, University Politecnica delle Marche, Italy
I-Fang Liu, National Central University, Taiwan
Imran Zulkernan, American University of Sharjah, United Arab Emirates
Jirarat Sitthiworachart, King Mongkut Institute of Technology Ladkrabang, Thailand
Jon Dron, Athabasca University, Canada
Joyce Pittman, Drexel University, USA
Juan Felipe Calderon, Universidad Andres Bello, Chile
Julie-Ann Sime, Lancaster University, United Kingdom
Katherine Sinitsa, Int. Res. Training Center for Info. Technologies and Systems, Ukraine
Kathryn Maccallum, University of Canterbury, New Zealand
Kuo-Liang Ou, National Hsin-Chu University of Education, Taiwan
Lence Miloseva, Goce Delcev University, Macedonia
Luis Anido, University of Vigo, Spain
Maiga Chang, Athabasca University, Canada
Michael Kerres, University of Duisburg-Essen, Germany
Michael Pollak, Graz University of Technology, Austria
Michael Verhaart, TANZ eCampus, EIT (Hawkes Bay), Open Polytechnic, New Zealand
Min Kyu Kim, Georgia State University, USA
Ming-Chi Liu, Feng Chia University, Taiwan
Ming-Puu Chen, National Taiwan Normal University, Taiwan
Minjeong Kim, Dankook University, Republic of Korea
Mohammad Khalil, University of Bergen, Norway
Ni Chang, Indiana University South Bend, USA
Patrick Blumschein, University of Education Freiburg, Germany
Radu Vasiu, Politehnica University of Timisoara, Romania
Richard Huntries, Athabasca University, Canada
Sanghoon Park, University of South Florida, USA
Sarfo K. Frederick, University of Education, Winneba, Ghana
Tassos Mikropoulos, The University of Ioannina, Greece
Ulrike Hanke, University of Freiburg, Germany
Vincent Barre, Le Mans University, France
Vivekanandan Kumar, Athabasca University, Canada
Wanli Xing, University of Florida, USA
Wolfgang Greller, Vienna University of Education, Austria
Yen-Ting Lin, National Pingtung University, Taiwan
Yu-Ju Lan, National Taiwan Normal University, Taiwan
Zacharoula Papamitsiou, Norwegian University of Science and Technology, Norway
